

HABIB AL FAUZAN

Jakarta, Indonesia | habibalfauzan1@gmail.com | [089648010876](tel:089648010876) | [Website](#) | [GitHub](#) | [LinkedIn](#)

Software Engineer with experience in backend development and smart factory systems for manufacturing environments. Skilled in optimizing system performance, troubleshooting complex issues, and maintaining reliable applications factories in multiple countries. Experienced in collaborating with global teams to integrate, support, and improve business-critical systems. Passionate about building scalable, efficient, and reliable software solutions.

EXPERIENCES

Software Engineer

LG Sinarmas Technology Solutions / December 2024 – Present

- ❖ Contribute to the development and maintenance of smart factory systems for EV secondary battery manufacturing across factories in multiple countries
- ❖ Maintain equipment interface logic to ensure reliable data flow between factory equipment and higher-level systems
- ❖ Develop HMI web pages that enable production workers and maintenance teams to monitor equipment status, conditions, and operational performance
- ❖ Monitor daily factory operations, troubleshoot system issues, and resolve production-related inquiries to support smooth manufacturing processes

IT & Data Science Developer Intern

United Tractors / February 2024 – June 2024

- ❖ Developed an annual schedule generator that handles more than 3000 events per year
- ❖ Built and optimized the application using Flask and SQLite, improving scheduling efficiency and data processing
- ❖ Enhanced data management and query performance to support faster and more accurate schedule generation
- ❖ Improved application usability and responsiveness, delivering a more reliable tool for end users

Data Scientist Project-Based Intern

Rakamin / October 2023

- ❖ Cleaned and pre-processed large sales datasets to ensure data integrity, quality, accuracy for analysis
- ❖ Developed interactive visualizations to highlight key sales trends and business insights for data-driven decision-making
- ❖ Implemented machine learning models for sales forecasting and customer segmentation
- ❖ Conducted clustering analysis to identify distinct customer segments and provide actionable insights for customer engagement strategies

Cloud Computing Cohort

Bangkit Academy / February 2023 – August 2023

- ❖ Developed backend API for capstone project using ExpressJS
- ❖ Utilized Google Cloud services, including Compute Engine, App Engine, Cloud Storage, and Firestore, to support application deployment and data management
- ❖ Collaborated with a cross-functional team to develop a mobile application as part of the capstone project
- ❖ Supported cloud and backend integration to enable data storage, retrieval, and application functionality

ORGANIZATIONS

Himpunan Mahasiswa Sistem Informasi UPN “Veteran” Yogyakarta

Staff of Entrepreneurship Department / February 2022 – December 2022

- ❖ Supported the successful procurement of official uniforms for association members
- ❖ Collaborated with suppliers to negotiate favourable terms and ensure smooth procurement processes
- ❖ Coordinated uniform distribution to members while balancing organizational responsibilities and academic commitments

FEATURED PROJECTS

Factory Equipment Monitoring

[Github](#)

Technology: Python, FastAPI, OPC-UA, React, TimescaleDB, Redis, Docker, Grafana

API Rate Limiter

[Github](#)

Technology: Go, PostgreSQL, Redis, React, Docker,

Predictive Maintenance ML Pipeline

[Github](#)

Technology: Python, FastAPI, XGBoost, MLflow, Prefect, PostgreSQL, Docker

EDUCATIONS

Bachelor of Information System

UPN “Veteran” Yogyakarta / GPA 3.86/4.00 / 2020 – 2024

Relevant Coursework: Web Development, Database Management System, Algorithm, Mobile Development, Cloud Technology, UI/UX Design, Software Development, Business Process Modelling, Customer Relationship Management, Software Quality Assurance.

CERTIFICATIONS

Junior Web Developer

Badan Nasional Sertifikasi Profesi (BNSP) | 2022

Google Data Analytics Professional Certificate

Coursera | 2022

TECHNICAL AND RELEVANT SKILLS

Languages	: C#, Python, Go, JavaScript, Java
Backend	: Express.js, Flask, FastAPI, Spring boot
Frontend	: React, HTML, CSS
Databases	: MySQL, Oracle SQL, PostgreSQL
Cloud & DevOps	: Google Cloud Platform, Docker
Data & ML	: Data Preprocessing, Data Visualization, MLflow, Prefect
Soft Skills	: Growth Mindset, Problem Solving, Collaboration, Communication
